---

## Experience

- **Frameable Inc** **New York, NY**  
*Software Engineering Manager, Infrastructure Lead* *October 2021 - Present*
  - Directed the Infrastructure and QA team at Frameable, overseeing a team of two engineers
  - Built a distributed testing framework leveraging Playwright and EC2 spot instances, resulting in drastically lower integration test runtimes with a fraction of the server costs
  - Re-architected the organization's infrastructure to use Docker and Nomad, saving more than \$10k/month in AWS
  - Established an extensive monitoring system for our services using Prometheus and Grafana
  - Designed a robust logging pipeline using Vector for data collection and transformation and ClickHouse for data storage, making logs more accessible and queryable across the engineering organization
  - Built out an extensive integration test suite, leading to a substantial increase in bugs caught before production
  - Spearheaded the engineering team's security initiatives, implementing modern standards and collaborating with external penetration testers
  - Built a new CI and deploy system on top of Github Actions speeding up deploys an average of 100%
- **Serious Eats** **New York, NY**  
*Full Stack Developer* *October 2019 - April 2021*
  - Co-led the development of new features and technical maintenance of [the internet's best cooking website](#)
  - Worked closely with the editorial team and designers to fully modernize and redesign the site navigation
- **Plectica** (Real time collaborative mind-mapping web app) **New York, NY**  
*Full Stack Developer* *April 2017 - October 2019*
  - Built the software behind [plectica.com](#) from the ground up together with a small team.
  - Designed and implemented a novel system for storing rich text, allowing full backwards compatibility in our database and bypassing the need for escaping user input
  - Developed a powerpoint export microservice

## Skills

- Languages: JavaScript, TypeScript, python, SQL, [s]css, SVG, Bash
- Servers/services: Nomad, Consul, Terraform, Node.js, Nginx, AWS
- Observability: Prometheus, Grafana, Vector.dev
- Databases: Mysql, Clickhouse, Sqlite, Redis
- Fluent in English and Danish, and conversational in Spanish

## Education

- **App Academy** **New York, NY**  
*Highly selective full-time full-stack web development course* *2017*
- **Reed College** **Portland, OR**  
*BA, Political Science* *2011-2015*
